

*"Who are they? where are they? what do they want?"*

# ALIEN TALES

*First-hand accounts revealing evidence of the  
existence of extraterrestrial life on Earth*

10 x 48 min.

## Main subject:

The Milky Way contains about 300 billion stars, each of them with its own planetary system. With this knowledge in mind, one day during a lunch break in Los Alamos, in the middle of a happy conversation between physicists on extraterrestrial life, Enrico Fermi suddenly asked: "But if they exist, where are they?" They exist - statistically they have had every chance to develop a civilization and also reveal themselves.

Their numbers are not lacking, so, where are they? For at least a century, we humans have been emitting our radio signals into space, which have now reached a million-billion-mile radius, bringing with them the evidence of our existence to hundreds of stars by now. Nobody has answered us yet. Are we really alone in the universe? Are we really so unique? This is perhaps the biggest question we have ever asked ourselves. Are there aliens? And how are they made? What thoughts do they have? What would happen if we met them?

What do we really know about life in the universe? What are the testimonies and evidence of scholars and people who have experienced first-person revelatory experiences?

The presence of extraterrestrial intelligence that periodically visits our planet is now scientifically proven. In the last sixty years, at least 150,000 events have been documented for which any hypothesis of "conventional" explanation has not proved to be valid.

Yet, many still do not believe in the extraterrestrial theory, in part because the political and military authorities continue to field a strategy of discredit.

The ten episodes of the series, lasting 48 minutes each, deal with the human-alien relationship in its various facets - from sightings to meetings, from more or less secret contacts, to great conspiracy theories.

Unpublished images shot by those who came across extraterrestrial phenomena, combined with reviews and interviews with experts in the field and those who claim to have had contact with alien lives, make this series unique in its kind.

## EPISODE 1 - THE ALIEN RACES

The first episode accurately outlines the main alien races on our planet, subject to frequent close encounters of the third type. Years of research and investigation have allowed scholars to illustrate features, physical, biological and psychological characteristics, as well as to provide technical, historical and sociological information on the various races.

## EPISODE 2 - CLOSE ENCOUNTERS OF THE SECOND TYPE

In the course of history, there have been many close encounters of the second type which, in addition to the sighting of the unidentified object less than 200m away, manifest themselves in the form of physical effects of interaction with the environment and people such as traces on the ground, electromagnetic interactions with electricity and equipment, unusual lighting effects, frightened animals or physical effects on humans.

## EPISODE 3 - CLOSE ENCOUNTERS OF THE THIRD TYPE

There are thousands of people around the world who claim to have had close encounters of the third kind with non-human creatures. The existence of aliens was also confirmed by soldiers on leave and former agents of the secret services, who also revealed the involvement of some governments in the management and shelving of the UFO phenomenon.

## EPISODE 4 - ALIENS RETURNS

One of the most recent and most significant developments in the UFO mystery is undoubtedly the fact that several thousands of people claim to have been abducted by aliens around the world. After having illustrated the basic characteristics that can be found in the stories of the abductees, it will be evident that in almost all cases there is a dimension that can be traced back to the major religions.

## EPISODE 5 - THEORY OF THE ANCIENT ASTRONAUTS

According to the theory of ancient astronauts, extraterrestrials have reached our planet in the past, leaving obvious traces of their passage. But what is the origin of this theory? To find out, let's prepare ourselves to face a long and fascinating journey, during which we will meet the history of science and technology, philosophers and spiritual movements, science fiction and pseudoscience, many other areas of human knowledge and also... the

## EPISODE 6 - UFO PROJECT GENESIS

According to an established theory, the technologically advanced extraterrestrials are responsible for the presence of humanity on Earth. The ancient descriptions of the meetings between the ancient Gods and the protagonists of the Middle Eastern Scriptures describe, in a rather explicit way, the encounters with extraterrestrials, beings in "flesh and blood" emerging from the dazzling light of a spaceship to give life to the human race.

## EPISODE 7 - HUMAN-ALIEN HYBRID

There are many striking cases in which witnesses (women, in this specific case), have declared that they have been abducted by non-human creatures, to find themselves later in sweet anticipation. This new type of "community of the future," that is, human beings and aliens, is developing in our society with a level of consciousness and sensitivity far superior to that of the average human.

## EPISODE 8 - WHEAT RIMS

Starting in the '80s, initially in the English wheat fields and then all over the planet, during the summer, the plants are mysteriously bent and intertwined to form hundreds of increasingly large and complex figures whose origins still remain unknown, but, according to existing evidence, are not the work of man. The most accredited hypothesis is that it is a "gentle" non-invasive system, used by external intelligences to manifest to the masses the reality of its presence and communicate more or less elaborate concepts through the artistic and sophisticated use of "sacred geometry."

## EPISODE 9 - THEORY OF THE CONSPIRACY

All the fans of "Men in Black," in the end, would like the conspiracy theories connected to the UFOs to be true. The most ardent supporters of these arguments, according to which governments around the world have concealed evidence of the existence of unidentified flying objects, are in the United States. However, the "believers" are everywhere and they have a lot of conjectures about the aliens.

## EPISODE 10 - ALIEN BASES ON THE EARTH

The aliens may already be "among us," to quote an expression frequently used in discussions on the subject. They may have already arrived on the planet without our knowledge and could be living isolated from our species so as not to be discovered. A list of what might be the biggest alien refugees on Earth has also been drawn up.

**Our Guests :**

**Stanton Terry Friedman** is a retired nuclear physicist and professional ufologist. He is the original civilian investigator of the Roswell incident. In 1970, Friedman left full-time employment as a physicist to pursue the scientific investigation of UFOs. Since then, he has given lectures at more than 600 colleges and to more than 100 professional groups in 50 states, 10 provinces, and 19 countries outside the US. Additionally, he has worked as a consultant on the topic. He has published more than 80 UFO-related papers and has appeared on many radio and television programs. He has also provided written testimony to Congressional hearings and appeared twice at the United Nations.

**Jacques Fabrice Vallée** is a computer scientist, author, Ufologist and former astronomer. Vallée is an important figure in the study of unidentified flying objects (UFOs), first noted for a defense of the scientific legitimacy of the extraterrestrial hypothesis and later for promoting the interdimensional hypothesis. In May 1955, Vallée first sighted an unidentified flying object over his Pontoise home. Six years later in 1961, Vallée claims to have witnessed the destruction of the tracking tapes of an unknown object orbiting the earth. He claims that an unnamed superior came and erased the tape. These events contributed to Vallée's long-standing interest in the UFO phenomenon.

**Jerome Clark** is an American researcher and writer, specializing in unidentified flying objects. He has appeared on ABC News Special Report, Unsolved Mysteries, Sightings and the A&E Network discussing UFOs. In the 1990s Clark authored the multivolume The UFO Encyclopedia: The Phenomenon From The Beginning. Library Journal stated in its review of The UFO Encyclopedia that "A respected UFO authority provides a much-needed update of the [UFO] field with this new encyclopedia...[it] is the most thorough treatment yet of this puzzling phenomenon...the [encyclopedia] should be considered by larger public and academic libraries."

**Allan Hendry** is an American astronomer and ufologist. UFO historian Jerome Clark calls him "one of the most skilled investigators in the history of UFO research." He was the main investigator for the Center for UFO Studies (CUFOS) in the 1970s. Hendry personally investigated over 1000 UFO reports. He was able to find mundane explanations for the vast majority of UFO cases, but he also judged a small percentage of cases to be unexplained. One of the most famous "unexplained" cases he investigated was the Val Johnson Incident in 1979, in which a deputy sheriff in Minnesota experienced a "collision" with an unknown object which damaged his patrol car and left him temporarily unconscious.

**Bruce Maccabee** is an American optical physicist formerly employed by the U.S. Navy, and a leading ufologist. Maccabee has been an active ufologist since the late 1960s when he joined the National Investigations Committee on Aerial Phenomena (NICAP) and was active in research and investigation for NICAP until its demise in 1980. He became a member of the Mutual UFO Network (MUFON) in 1975 and was subsequently appointed to the position of state Director for Maryland, a position he still holds. In 1979 he was instrumental in establishing the Fund for UFO Research (FUFOR) and was the chairman for about 13 years. He presently serves on the National Board of the Fund.

**Kevin Douglas Randle** is a prominent ufologist. Within the UFO community, he is often regarded as one of the preeminent experts on the reported crash of a UFO near Roswell, New Mexico in July 1947. A professional writer with more than 80 books to his credit, Randle is perhaps best known for his books about UFOs and the Roswell story. Randle, along with Stanton Friedman, is generally acknowledged as one of the leading researchers into the Roswell story and the UFO question. He continues to work in the UFO field, although lately he has concentrated more on his science fiction books than UFO research.

**Antonello Lupino** Researcher in the field of ufology for about 25 years and director of the CUI, International UFO Center. In May of 1973, a bright light gave him a remarkable "tanning" out of season. The episode was repeated about 5 years later, when, while he was at sea, he was chased by a light that was several meters underwater, which subsequently emerged a few meters from the boat on which he and his friends they were scared refugees. The object was a luminous globe! Since then the author has been more and more interested in ufology, studying the phenomenon in all known and lesser known aspects.

**Pier Fortunato Zanfretta** owes his fame to the fact that he sustained, between 1978 and 1981, eleven episodes of close encounter of the third and fourth type (IR3 / 4) with alien beings of the reptilian type. Zanfretta describes these aliens as green and rippled skin, almost three meters high, with large points on the head and yellow triangular eyes; he declares that they would come from a dying planet of the "third galaxy" named "Titania", and they would have seen in the Earth one of the possible planets to relocate to in the future. The aliens would be called "Dargos" and would be completely peaceful.
