HIGHWAY TO THE ARCTIC: Canada's Ice Roads

Film by: Karl Teuschl

Produced by: Kick Film for SR, arte

Length: 45'

Year of Production: 2016

Language: English, German, French

Format: HD

Genre: People . Places

Short Synopsis

Every winter, ice roads are built across hundreds of miles in Canada's far north, connecting frozen rivers and lakes, and stretching up to the very northern tip of the country by the Arctic Ocean. For the people living in the remote villages of this region these "ice highways" are of vital importance. Until April, trucks are coming up here all the way from down south, bringing supply goods for the whole year to these locals, and life changes —remote hunting grounds are now easier to reach and the ice roads are turned into a place for fairs where people can celebrate life and their culture. Until the ice roads are melting again and disappearing into the ocean.

Long Synopsis

Every winter, ice roads are built across hundreds of miles in Canada's far north, connecting frozen rivers and lakes, and stretching up to the very northern tip of the country by the Arctic Ocean. For the people living in the remote villages of this region these "ice highways" are of vital importance. Until April, trucks are coming up here all the way from down south, bringing supply goods for the whole year to these locals, and life changes until the ice roads are melting again and disappearing into the ocean.

For decades, ice roads have been built across the icy tundra in Canada's far north, the Northwest Territories, every single winter. These so-called "ice highways" lead to a remote and inhospitable world impresses everyone with its raw beauty. It is a cold primeval world, almost unimaginable for Europeans these days, yet people are actually living there. The locals, who have settled in remote villages up here, have adjusted to the Arctic nature; the ice roads are their temporary connection to the outside world. While life in summertime can

be tough and arduous, winter allows the locals to replenish their stocks, easily reach remote hunting grounds and turns the ice roads into a place for fairs where people can celebrate life and their culture.
